RESEARCHER

Hollywood's Racist Hatemongers

Steven Spielberg, the creator and occasional director of 'Amazing Stories.'

A 20th century riddle: When is hate propaganda not hateful? Answer: When it is directed by Jews and promotes hatred of Germans, Arabs and Whites.

Hollywood Nazis

Forty-five years after World War II and old hatreds are still being dug up by the media. The "bury the hatchet" sentiment is nowhere in sight today. Nazism is too lucrative. Put a swastika on the cover of a book or video and it will sell. Establishment "anti-Nazis" have been raking in the shekels for years in this way. Independent media critics have warned against the "Hollywood Nazi" phenomenon created by the Jewish media itself.

Disaffected White youths with little factual knowledge of the actual historical record of the chivalry and civilization of Germany and the American South, get their behavioral cues from Hollywood's TV make-believe and end up imitating grotesquely falsified Tinseltown versions of how Germans and White Southerners supposedly acted in the past.

Stuffed full of Jewish media sewage, White kids are led to believe that the great White warriors of history were bloodthirsty monsters. Jewish TV never informed them that every Aryan warrior worthy of the name, from the Confederacy to Sparta, fought without cruelty and regarded any other attitude as sheer alien sadism.

The multi-billion dollar "Holocaust Survivor" industry would go bankrupt without reanimating the cadavers of Hitler and Company nearly every day on TV and then presenting them in the most sensationalized and pornographic manner possible. When impressionable White kids immersed in this orgy of Hollywood "Nazism" start to imitate what they see on the TV screen, Jews scream themselves hoarse about "the rise of Neo-Nazism!" But who planted the distorted images in the kids' heads in the first place?

Jews Dominate Television Production

Matters have gotten so absurd that it is widely regarded as hateful even to cite *the fact* that anti-White TV stereotyping is directed by a media cartel that is largely dominated by Jews. According to a Jewish source:

"Many in TV fear criticism that their industry is dominated by Jews. 'People here are very defensive about charges that Jews run the entertainment business... celebrated Jewish writer and producer, Marshall Herskovitz...is a co-creator with Edward Zwick, of ABC's Emmy-award winning show *thirtysomething*."

"In an interview the day his show won another 13 Emmy nominations, Herskovitz said he was one of many people in Hollywood, 'a little sick of the dissembling' by Jews in the entertainment industry. 'Hollywood was basically created by Jews and movies for 75 years have been about Jews...' he said.[Canadian Jewish News, Nov. 16, 1989, p. 9].

According to a 1986 poll by the Rothman-Lichter agency, 60% of television's top executives are Jewish. [The Wanderer, Jan. 15, 1987, p. 9].

The documented facts, admitted by Jews themselves in such books as *An Empire of their Own: How the Jews Invented Hollywood* and *Goldwyn: A Biography*, that TV and films are overwhelmingly controlled by Jews, are

dismissed by the news media as "bigotry," with tired cliches about "an anti-semitic canard."

Speaking the unfortunate truth about the Jewish role in disseminating racist propaganda against Whites is regarded as something to be feared and suppressed by the State in the name of the State religion of our time, Jewish "Holocaust" mania.

The equation boils down to the lunacy that speaking any unflattering truth about Jews is "racist." It's not truth that we are to be concerned about, according to modern ethics, but the "painful" effect truth-telling has on delicate Jewish ears unaccustomed to anything except sychophancy.

According to Scott Berg in his biography of the Polish Jew Samuel Goldwyn [a.k.a. Schmu-el Gelbfisz, head of the famous Metro-Goldwyn-Mayer movie studio], "the Hollywood moguls were almost all Jewish." (NY Times Book Review, March 26, 1989, p. 24).

Jewish media analyst Dr. Kenneth Mitzner describes MCA/Universal Studios, as a "giant entertainment conglomerate, where most of the power is in the hands of my fellow Jews and many of the wealthy executives are indeed prominent in the organized Jewish community." [The Wanderer, June 1989, p.8].

The man who "controlled the programming destinies of each of the three (TV) networks in the course of two decades" is Fred Silverman, who was alternately director of programs for ABC and then CBS and later chief executive of NBC. [NY Times, June 5, 1989, p. D-1].

The man responsible for all the news about Israel and the Palestinians shown on the CBS television network is Michael Rosenbaum, director of CBS-TV for the Middle East. [Al Fajr, June 26, 1989].

The chief correspondent for the NY Times responsible for all coverage of Israel and the Palestinians in America's most influential newspaper was Thomas Friedman who admits he was a committed Zionist from the age of 15. [Publisher's Weekly, July 14, 1989, p. 54].

During the entire 12 years of Adolf Hitler's reign of the Third Reich, exactly three anti-Jewish movies were produced. In our time, three anti-German, anti-White propaganda films are sometimes in production *every week*. Blockbuster Video is a popular California chain of video stores. In a single month the video conglomerate purchased five new Hollywood releases for its stores that were hate propaganda films libeling Whites and Germans: *War Party*, *Heart of Dixie*, *River of Death*, *Trapper County War* and *Forced March*. [Blockbuster Video, March 1990 catalogue].

Hollywood has been turned into a citadel of hate, lies and negative caricatures against Germans and White people generally--all in the name of "human rights."

These racist Jewish TV programs constitute a form of psychological warfare against us by repeatedly lying about our ancestors and creating stereotypes of them as heinous monsters. Through this process of perpetual negative TV stereotyping, feelings of self-hate and low self-esteem are instilled in our people. Meanwhile Hollywood is scrupulously careful to always portray Jewish ancestors, traditions, heritage and events with

the utmost sympathy and sensitivity.

No TV Movies About Jewish Crimes

Viewers will search in vain for movies and TV programs about Jewish war crimes against Palestinians; Jewish-Communist massacres of the Christian people of Russia and Eastern Europe during the days of Lenin, Trotsky, Frenkel, Berman, and Zinoviev; or Allied war crimes against the tens of thousands of German women and children burned alive in Dresden, Pforzheim and dozens of other German cities in a genuine and unsung World War Two holocaust.

These facts about Jewish crimes in history *are routinely censored from network television and the movies*. Jewish TV moguls censor films that might tell the truth about Jewish holocausts against non-Jews. Television creates the false impression that Jews are always blameless victims, never war criminals or racists.

The pretext for the continuation of "Holocaust" propaganda bombardment is lofty Jewish rhetoric about the "compelling need to never forget crimes against humanity so that they will never be repeated again."

This is a lie. Jews seek to cover-up their own crimes whenever possible. Former Secretary of State Henry Kissinger told a private Hollywood gathering of Jewish media executives that television coverage of Israeli atrocities must be banned (L.A. Times, March 30, 1988). Former NY City Mayor Edward Koch advocates censorship of TV news footage in order to protect Israeli army war criminals from exposure (L.A. Times, March 16, 1988, p. 9).

According to a poll of Israelis conducted by the Jewish-operated Israeli-Diaspora Institute, fully 63 percent of Jews in Israel agreed that media reports or pictures depicting Israeli soldiers mistreating Palestinians "should be banned because they harm Israel's image" [Canadian Jewish News, March 15, 1990, p. 8].

As of this writing and for several months preceding, Israeli armed forces have barred reporters from southern Lebanon even under U.N. escort. (LA Times, March 29, 1990, p. A-5. This fact was buried in the last paragraph inside an LA Times story on another topic). It is in south Lebanon where the Jewish soldiers carry out some of their worst atrocities. So, conveniently, TV cameras and reporters are banned. Jews must be allowed to conduct their crimes in secret.

When Professor Robert Faurisson of the University of Lyon, an internationally-known author of scholarly books questioning homicidal gas chamber extermination claims, was severely beaten, his skull fractured and his jaw broken by three Jewish attackers on Sept. 16, 1989, the NY Times didn't even report this barbaric attack. But if three skinheads had beaten a Jewish professor of "Holocaust Studies" the uproar on the front page of the NY Times would have been truly cataclysmic.

The veneer of the pretext for "Holocaust" propaganda movies is wearing thin. It is obvious that these films are not broadcast in any humanitarian interest but as part of a deliberate attempt to permanently stigmatize those of White European descent with the stamp of criminal evil while promoting the preposterous fantasy that Jews are

eternal victims, never themselves war criminals or state terrorists.

Jewish TV: Psychological Warfare

The ever-continuing growth of filthy, lying "Holocaust" propaganda is completely toxic to the mental and spiritual health of our children, the honor of our heritage and the memory of our ancestors. No people can long survive intact as a people under so deadly a non-stop barrage of negative characterization.

The unmistakable and overwhelming message of the hundreds of hate propaganda films produced by Hollywood's racist hatemongers is that anyone who opposes Jewish thought control is the devil incarnate and any White who fights back against negro street crime and rape, who wants to live separately with his own kind, or who seeks to uphold the White heritage which built America-the-Beautiful, is a low-down, dirty, bigoted animal.

The public stigma of bigotry and mindless violence is attached exclusively to Whites as a deliberate psychological warfare tactic for imposing feelings of self-hate. Major Establishment newspapers like the NY Times and the LA Times have a censorship policy of concealing the race of negro and "Latino" attackers and White victims in many published crime reports.

It is in these "street-crime" type of encounters that the reality of Black and 3rd World racism is revealed. Acts in which Blacks and other non-Whites deliberately target White people for robbery, rape and murder just because they are White, occur every day in our nation and accurate reporting of these hate crimes would create a mind-boggling awareness of the extent to which Whites are brutally victimized with impunity by Black racists.

Negroes and Latinos murder and rape White women, children and the elderly daily in America's cities for reasons of race. What proportion of this awful carnage is inspired by Jewish television's constant depiction of traditional White people as evil scum? How much of this horrible violence might be prevented if the media reported Black racist attacks the way they give front-page coverage in cases where a White separatist even sneezes in the direction of a negro? Patrick Buchanan:

"As we look at our crime capitals--Washington, Detroit, Phoenix, Miami, New York, L.A.--how many are victimized by Klan terror? Of 20,000 murders reported each year, how many are the work of neo-Nazis? One, two, five? Recently, the national press reported that one in four young Black males was locked up, or on probation or parole. Violent crime in America is primarily the business of minorities..." (Wanderer, March 22, 1990, p. 5).

The truth of Mr. Buchanan's words would never be discerned from our television sets, which promote the ludicrous conspiracy theory that America is under a gigantic threat of imminent terror and takeover by White "supremacists," while negroes only want to pray, sing, rap and vote, and Jews are the culture-bearing, perpetual saints of Western Civilization.

The non-reproducing birth-rates, catastrophic abortion rates and other ominous signs of drastic White decline, are symptoms of a profound self-hate which is a direct

result of the perpetual dissemination of lies and negative stereotyping about us in the media. Jewish television and Jewish movies are psychological warfare against us, a continuation of physical warfare by other means, but with the same end-result: the degradation and eventual elimination of the White race through the poisoning of our minds.

A Partial Inventory of The Perpetual Cinematic Group Libel, Psychological Warfare and Mental Genocide Produced, Distributed or Sponsored By Hollywood's Racist Hate-mongers. [Note: Everyone of the following films contains a distorted account of events depicted and in many cases the entire script is based on outright lies. Bearing false witness against a single individual is regarded as a grievous crime under the Common Law. What magnitude of crime is it to bear false witness against an entire nation of people perpetually, on television, in the newspapers and at the movies, as the Jewish-controlled media have done?]
